## DEPARTMENT OF PUBLIC WORKS

### ***Expected Outage Period:***

***Tuesday, April 22, 2014, 9:00 p.m. - Wednesday, April 23, 2014, 7:00 a.m.***

On Tuesday, April 22<sup>nd</sup> starting at 9:00 p.m. until Wednesday, April 23<sup>rd</sup> at 7:00 a.m. the City of Grover Beach will be making repairs to the 12" water main in the vicinity of South 13<sup>th</sup> Street and Longbranch Avenue. Customers in the following locations will not have water during the repair:

- 13<sup>th</sup> Street from Brighton Avenue to Longbranch Avenue;
- West 12<sup>th</sup> Street from Brighton Avenue to West Grand Avenue;
- West Grand Avenue from 12<sup>th</sup> Street to 14<sup>th</sup> Street; and
- Ramona Avenue from 12<sup>th</sup> Street to 13<sup>th</sup> Street.

If you have questions regarding this repair, please call (805) 473-4520.

## **PUBLIC NOTICE CONSUMER ALERT DURING WATER OUTAGES OR PERIODS OF LOW PRESSURE**

1. If you are experiencing water outages or low water pressure, immediately discontinue any non-essential water use. This includes all outdoor irrigation and car washing. Minimizing use will reduce the potential for the water system to lose pressure or run out of water. If you have any questions, please do not hesitate to contact our office at the phone number listed below.
2. If the water looks cloudy or dirty, you should not drink it. Upon return of normal water service you may clear the lines by allowing the water to flow from an outside faucet for a **few minutes**.
3. If you are concerned about the water quality or are uncertain of its safety, you may add eight drops of household bleach to one gallon of water and let it sit for 30 minutes or alternatively, if you are able, water can be boiled for one minute at a rolling boil to ensure it is safe for consumption.
4. Use of home treatment devices does not guarantee the water supply is safe after low pressure situations.
5. Do not be alarmed if you experience higher than normal chlorine concentrations in your water supply since the California Department of Public Health is advising public water utilities to increase chlorine residuals in areas subject to low pressure or outages.
6. The California Department of Public Health has also advised public water systems to increase the bacteriological water quality monitoring of the distribution system in areas subject to low pressure. This may include collecting samples in your area to confirm that the water remains safe for consumption. You will be promptly advised if the sampling reveals a water quality problem.
7. The City of Grover Beach Public Works Department is committed to ensuring that an adequate quantity of clean, wholesome, and potable water is delivered to you. We recommend that you discuss the information in this notice with members of your family to assure that all family members are prepared should water outages or low water pressure occur.
