A Message from the Citizen Oversight Committee

The Citizen Oversight Committee is pleased to forward its 2019 report on X-06 Transactions and Use Tax revenue and the progress of the \$48 Million Measure K-14 Street Bond Program. The committee's job is to carry out the principal duties of ensuring that revenues from these measures have been expended for the purposes set forth in the ballot language, reporting progress annually to the public, and providing a compliance statement.

The funding provided by Measure X-06 Transactions and Use Tax is used to support general city services including police, fire, public works, parks and recreation and general city administration. The committee's task is to review the annual summary of revenues generated from the supplemental sales tax and budgeted expenditures for the upcoming fiscal year. The committee reviewed this information, which disclosed no issues or concerns.

The City has issued \$28 million of the \$48 million in approved bonds. The funding provided by Measure K-14 is a community investment in improving local streets in Grover Beach. The improvements are essential to improve drivability, maintain emergency response times, enhance safety for pedestrians, bicyclists, drivers, and promote economic growth in the City.

The committee reviewed the FY 2018-19 independent auditors report related to revenues for both measures which disclosed no instances of non-compliance. The committee wishes to report that, to the best of its knowledge, the City is in full compliance with the parameters of Measure X-06 in generating general revenues to support general city services and Measure K-14 which states that "The object and specific single purpose of issuing the Bonds is the acquisition, construction and improvement of street improvements throughout the City" (the "Street Improvements"), and the proceeds of the Bonds may only be applied to that purpose.

A Message from the City Manager

Thank you for your interest in the report of the Citizen Oversight Committee for City Revenue Measures. This is the first report of the newly constituted oversight committee tasked by the City Council with reviewing revenues and expenditures for both Measure X-06 and Measure K-14. Measure X-06 is a transactions and use tax approved by voters that established a half-cent sales tax as a general revenue to fund City services and projects. Measure K-14 was authorization approved by voters to issue up to \$48 million in general obligation bond funding to repair local streets and roads. The City has diligently funded important City services through annual revenue from Measure X-06 and has successfully completed seven street rehabilitation projects as of June 30, 2019 with repair of 175 blocks representing approximately 46% of local City Streets. This report provides the taxpayers a summary of how these voter-approved revenues are being spent consistent with the parameters of each measure.

Measure X-06 Status Report

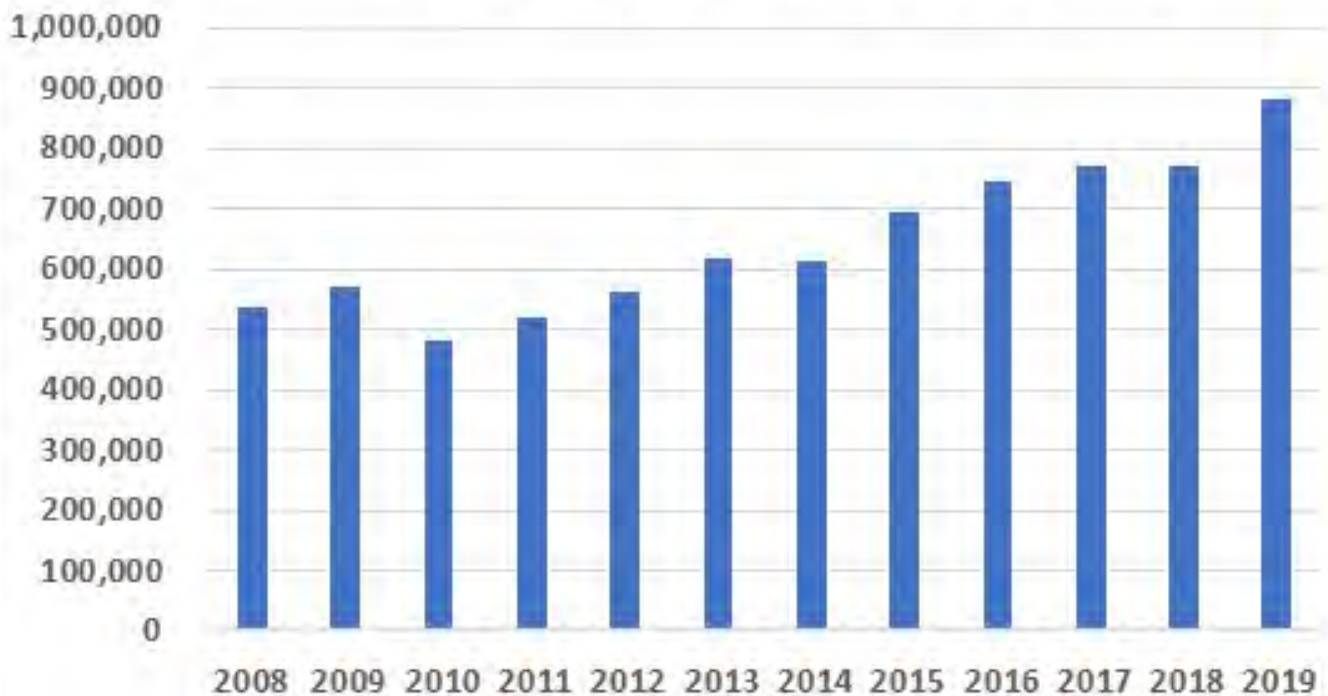

Fiscal Year	Amount	% Change
2008	537,312	
2009	571,609	6.4%
2010	480,888	-15.9%
2011	518,873	7.9%
2012	562,988	8.5%
2013	618,041	9.8%
2014	615,900	-0.3%
2015	695,089	12.9%
2016	747,043	7.5%
2017	771,475	3.3%
2018	770,164	-0.2%
2019	884,366	14.8%
Average Annual % Change		
Last 2 Years		7.3%
Last 5 Years		7.7%
Last 10 Years		4.8%

Summary

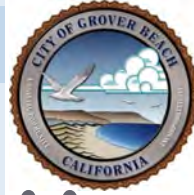

In 2006, voters approved Measure X-06, a transactions and use tax at the rate of one-half percent (0.5%) to be administered by the State Board of Equalization as a general revenue to support City services and projects.

Prior to the consolidated oversight committee, the Council appointed a citizen committee to review an annual report to verify revenues generated from the Measure X-06 Transaction and Use Tax and submit to the City Council.

Fund Balance June 30, 2019 **\$ 11,641,130**
(After Accruals)

Summary

Through funds provided by the Measure K-14 Street Bond, the City of Grover Beach has completed seven street projects, one (outlined below) that is nearing completion and is expected to begin the ninth project before the end of 2019. These projects, outlined in the attached map, provided maintenance and repair of 201 blocks or approximately 15 miles of roadway, representing about 46% of all local streets.

Project 2295-6 (Newport Avenue) was approved for construction in April 2019. This project will provide maintenance and repair of 14 city blocks. This project is one of the more complex projects given the length of the street, the interest in narrowing a street with a 100-foot public right of way and the need to address significant grade differences between the north and south sides of the street. The project is expected to be completed in early 2020.
